KEY INDICATORS OF THE LABOUR MARKET

The Key Indicators of Labour Market (KILM) are very important in measuring the status of a country's labour market. 17 KILM indicators have been introduced by the ILO in the ninth edition of the Key Indicators of the Labour Market (KILM) manual. These KILM indicators mainly measure the state of the labour force, employment, unemployment, underemployment, education levels, wage and compensation costs, labour productivity and poverty, which are effervescent factors in a healthy labour market. This report discusses the current statistical trends of 10 KILM indicators for Sri Lanka at several levels of disaggregation and with the comparison of world scenario.
